Scotch-Brite™ Surface Preparation Pads

Reduces the need for chemical strippers. Use pad with neutral cleaner or water. If neutral cleaner is used, rinse floor with water prior to applying floor finish. Once floor is dry, dust with 3M Easy Trap Duster before applying floor finish. Helps reduce labor hours and material costs related to stripping floors. No slippery residue from strippers. No stripper cleanup on baseboards or nearby floors. No chemical contamination on skin, clothes and shoes. Effectively removes floor finish, leaving a clean surface ready for recoating. Product can be used on vinyl tile, marble, terrazzo, concrete and other floor types. Prepares hardwood floors for finish applications. Scuffs surface to create optimal bonding of finish. Diffuses scratches and conforms to uneven surfaces. Use with water-based or oil-based finishes.

3M™ Clean-Trace™ ATP Surface Test UXC

Designed to help hospitals assess the cleanliness of a surface and validate the efficacy of cleaning protocols and worker performance in less than one minute.

Item	Pack
76333	1 CS/EA

3M™ Clean-Trace™ ATP System

Helps address the problem of healthcare associated infections (HAIs) by detecting the presence of organic contamination you cannot see. A surface may look clean, but that's no guarantee. In 30 seconds, this systems rapid hygiene test allows you to assess and measure cleanliness, as well as validate the efficacy of your cleaning protocols and performance. The system utilizes adenosine triphosphate (ATP) bioluminescence to measure organic matter on small surfaces. Organic materials contain ATP which emits light when combined with compounds in the 3M™ Clean-Trace™ ATP swab. Invisible to the eye, the light is measured by the 3M™ Clean-Trace™ NG Luminometer. The system captures and stores test data, enabling it to be analyzed and trended.

Rider Scrubbers

Advance 2800 ST & 3400 ST Rider Scrubbers

The Advance 2800 ST and 3400 ST scrubbers deliver high performance results on a back-to-basics rider-scrubber platform. Manual control of the scrub deck and squeegee replace intricate electronics to keep operation simple without sacrificing performance. When your job calls for scrubbing large spaces at a lower total cost to clean, Advance's ST scrubbers are a smart choice. An open operator compartment allows cleaners to get on and off the machine from either side and provides clear sight lines to the floor. To start scrubbing, just manually lower the scrub deck and squeegee and press the foot pedal.

Training is easy for operators of all experience levels, and minimal adjustments are required while using the machine. The calibrated low-solution-flow setting provides 85 minutes of run time on a single tank, for consistently clean results on moderately soiled floors. For high traffic areas, operators can increase the solution flow rate at the touch of a button and apply more down pressure, for more aggressive cleaning. The patented Safe 'N Dry™ squeegee system uses a perforated squeegee to remove the collected water under the squeegee and allows for 100% water pick-up for safe, dry floors. Simplified mechanics and design make operation easy. Brush drive motor: 0.5 hp; Drive motor: 1.05 hp. Vacuum motor: 0.75 hp; CFM 66 @ 2" orifice. Sealed waterlift: 63" H2O, two pad holders.

Upright Vacuum

Advance Spectrum™ 12P & 15P Upright Vacuums

Advance's 12 inch and 15 inch Spectrum single-motor upright vacuums deliver superior results with performance where it matters most: dirt pickup and filtration. Upright vacuums rely on a combination of dirt pickup to remove soil from carpets and filtration to ensure that dust and other airborne particles stay captured. Spectrum's innovative design has earned the CRI (Carpet & Rug Institute) Seal of Approval, signifying that Spectrum meets the industry's newest dirt pickup and filtration standards for vacuum performance. These standards are more stringent than those for Green Label certification. The two-stage, 1,000 watt motor in Spectrum™ vacuums allows operators to pull dirt and dust from carpets in a single cleaning pass. 120V, 60 Hz, 1000 W, 9 amp, 2-stage. Airflow bypass valve and thermal overload protection.
